

PROTECT OHIO CLASSROOMS

Take Action Now!

Why It Matters

Ohio's student centered, adequate and predictable Fair School Funding Plan was built on real student needs—yet the Ohio House's proposal:

- Shortchanges public schools by \$2.75 billion by scrapping the Fair School Funding Plan.
- Caps local school districts carryover reserves at 30%.
- Revives unconstitutional and arbitrary budgeting.

Our Key Concerns

• Equity & Evidence

The Fair School Funding Plan reflects bipartisan research on the true cost of educating every Ohio student. The House plan ditches that work for a one-size-fits-all formula that leaves most districts with only an extra \$50 per student over the next two years.

• Loss of Local Control

A 30% carryover cap and rigid formula strip districts of budget flexibility—forcing more frequent levies instead of empowering local solutions.

• Student Success

Only a predictable, student centered, and needs-based formula like the Fair School Funding Plan ensures stable staffing, wrap-around supports, and quality programs for all students, including for our most vulnerable learners.

1. Email Your State Senator

The Fair School Funding Plan reflects bipartisan research on the true cost of educating every Ohio student. The House plan ditches that work for a one-size-fits-all formula that leaves most districts with only an extra \$50 per student over the next two years.
